THE GAP-TO-VALUE METHOD · STEP 5

Evidence Check

Fictional demo evidence only

Rule-based documentation check · NOT independent skill verification.

Signed in · your saved records are private Sign out

1. Enter assessment evidence

Use fictional data only. For demo: source “Demo internship test”, date a past date, note “Practice Excel quiz”.

Assessment type

Excel

Source label (optional to demonstrate missing evidence)

Demo internship test

Assessment date

dd/mm/aaaa

Evidence description

Fictional assessment result description

Check and save evidence

2. Inspect the outcome

Submit a fictional record to see its evidence-limited result.

WEEK 12 · CORE BUILD

Your evidence. Clearer decisions.

Organize baseline skills evidence with transparent checks. See what is documented, what is missing, and what only an employer can decide.

Try evidence check

How it works

Prototype only: evidence completeness is not independently verified capability or a guaranteed assessment waiver.

SAMPLE RESULT · FICTIONAL

Excel baseline record

Documented

The submitted record contains the required administrative fields.

Not established

Independent skills verification · employer acceptance · an assessment waiver

3. Your saved evidence history

Only records associated with your authenticated account should appear (Supabase RLS).

Excel — Incomplete

Source: Unknown · Date: Unknown
No description
Recorded: 1/11/2026 · NOT an employer-approved credential.

Excel — Incomplete

Source: Unknown · Date: Unknown
No description
Recorded: 1/11/2026 · NOT an employer-approved credential.

Excel — Documented

Source: Demo internship test · Date: 2026-10-15
Practice Excel quiz completed for internship preparation.
Recorded: 1/11/2026 · NOT an employer-approved credential.

2. Inspect the outcome

ADMINISTRATIVE STATUS

Incomplete

Missing fields are unknown, NOT a failed skills assessment.

Missing fields

- Source
- Valid assessment date
- Evidence description

What is NOT proven

- Self-reported record; no independent test result authenticated
- Candidate skill is not verified by this field check
- No employer acceptance or assessment waiver has been established

Human review is required for skill interpretation, employer acceptance, and any waiver decision.

3. Your saved evidence history

WHAT THIS VENTURE IS

Proof with limits, not promises.

Need

Students applying for internships can encounter repeated baseline skill assessments. The first user is a university student; participating employers would be the potential paying customers. Employer willingness to pay is untested.

10:1 case

The hypothesis: ten equivalent screening checks could become one reusable verification if employers accept the same baseline and actually waive nine tests. This is an unproven proposed improvement, not achieved savings.

Method as engine

Step 5 of the Gap-to-Value Method checks objective evidence requirements, separates supported fields from unknowns, and reserves consequential conclusions for an employer.

What it cannot do

This prototype cannot certify real skills, guarantee jobs, replace an employer assessment, or claim independent credential authenticity. Records are explicitly self-reported demo evidence.
